Simplify Voice Communications

S-NET's Cloud Phone Systems provide high quality, reliable digital voice communications at an affordable price with state of the art features and brand new IP phones with a lease option.

s·net COMMUNICATIONS

CLOUD BASED BUSINESS PHONE SYSTEMS

Keep your team connected from anywhere and any device

The S-NET Connect Mobile and Desktop Apps ensure business continuity when staff members are working remotely. Enable your users to make and receive calls using their office extension and caller ID to maintain a consistent brand image at all times.

Quick and Easy Migration

Migrating your phone system to the cloud is quick and easy, with little to no start-up costs and no-fuss maintenance.

Seamless CRM Integration

Your cloud phone system can be seamlessly integrated with your CRM, including Salesforce®, Zendesk, Sugar, Bullhorn, Zoho, Microsoft Dynamics, and many others.

Disaster Recovery & Continuity

S-NET's disaster recovery and business continuity plan protects your system settings and call data to ensure uninterrupted service, no matter the circumstances.

Ecosystem Integration

Our solution can be easily embedded into your existing tech ecosystem. It can integrate via API with Dropbox, Google, Microsoft Office 365, SharePoint, Skype for Business, and many more.

Experience high quality, reliable business communications and reduce your business expenses

With no capital expenses and a quick and easy migration, an S-NET VoIP Cloud Phone System unites your sites and offers a wide range of easy-to-use features fully customizable to support your organization's unique business objectives.

- ☑ Say goodbye to your outdated, unsupported premise-based phone system and expensive long-distance or international calling.
- ☑ Never worry about complex maintenance requirements.
- ☑ No costly upgrades - updates for features and functions are handled automatically by S-NET.
- ☑ Lease brand new IP phones and lifetime warranty on all hardware.
